3 Courses

IBM

Penetration Testing, Threat Hunting, and Cryptography

Incident Response and Digital Forensics

Cybersecurity Case Studies and Capstone Project

Jan 25, 2026

Siddhanto Goswami

has successfully completed the online Specialization

Security Analyst Fundamentals

With this specialization, the learner acquired knowledge of forensic tools, incident response planning and penetration testing. The learner also gained knowledge of threat intelligence, multiple network defensive tactics, application security, data loss protection, endpoint protection and SIEM tools. The learner's knowledge was tested through multiple assessments throughout the courses. The learner applied skills to complete several virtual labs and to investigate a real-world security breach identifying the attack, vulnerabilities, costs and prevention recommendations.
